Editorial

Dear IADMFR members,

This is my first contribution to the newsletter as president-elect of the IADMFR. Hereby, my sincere regards to all of you!

The 22nd IADMFR International Congress in Philadelphia is behind us now and we have all returned to our daily lives.

I am pretty sure some of us are already looking forward to another opportunity to meet with friends and colleagues, to share our experiences, expertise, knowledge and enthusiasm for our specialty.

Every meeting I attend, I am pleased to see new, younger colleagues are joining our meetings. This means the enthusiasm for our profession must be contagious!

2 The next IADMFR meeting that we should highlight in our calendars is the 2021 ICDMFR in Gwangju (Republic of Korea), where I will be sure to see many familiar faces again along with young fresh new followers.

We should also try to spread the word of our association among medical radiologists to bridge the gap between our, in many ways, overlapping professions. At the same time, we also have to think “outside of the box” and reach out to other professions (e.g. computer technology, mathematics, physics) to explore new applications and broaden our scope of interest.

I am very excited that IADMFR has given Dr. Louise Brown and myself the opportunity to organise the 2023 ICDMFR in Perth, Australia. This will be the first time the IADMFR scene will meet in Australia for its biennial meeting.

I would like to take the opportunity to ask everyone in our organisation to support our new president, Dr. Soon-Chul Choi, in his task of organising the 2021 ICDMFR in Gwangju.

Please encourage your colleagues and students to engage with research, and share your enthusiasm with them to attend and participate at the conference. Together we can pave the route to the future

I wish you all well and hope to see you at the many DMFR events that are organised all over the world!

Sincerely Yours,

Associate Professor Dr. Johan Aps

IADMFR Newsletter Editor

Report from the President

Dear IADMFR members and colleagues,

I took over the presidency of IADMFR from President Jie Yang on 25 August 2019 after the 22nd ICDMFR in Philadelphia. First of all, I would like to greet you now in this newsletter.

Once again, I would like to express my sincere gratitude to the President Jie Yang, Vice-President Mustafa Badi, American friends and colleagues, and all those who have worked hard in various fields to provide us with a rich and memorable congress.

The next congress will take place in Gwangju, South Korea from 28 April to 1 May, 2021. The pre-congress is 27 April.

Theme of congress is "Reading and Leading Dentistry".

The congress city is Gwangju. As the 10th congress was held in Seoul in 1994, this time the host city will be a new venue. Like many other countries, there are plenty of unique and beautiful cities in Korea besides Seoul. Gwangju is a city where Korean traditions are well preserved and is also known as the hometown of traditional arts. Everyone participating in the congress will be able to experience the authentic and impressive culture.

We haven't confirmed the detailed schedule yet, but we will inform you in advance of the approximate overall schedule including the social program. Please refer to the promotional postcard below. And please mark your schedule and plan ahead.

We will keep you informed of upcoming schedules and issues via the congress homepage (<http://icdmfr.org>).

I sincerely invite all of you to the 23rd Gwangju Congress in 2021.

Please come and share your academic knowledge, build friendships between members and colleagues, and enjoy Korean culture and nature.

Thank you,

Soon-Chul Choi

President, IADMFR

Report from the Secretary General

Dear IADMFR members, dear colleagues and friends,

Last August, all participants at the ICDMFR congress in Philadelphia attended an interesting scientific programme with a pleasant atmosphere amongst friends. On behalf of IADMFR, we would like to congratulate Jie Yang and his team for all their efforts and achievements in relation to this memorable congress. Now we are moving on and already preparing for the next IADMFR congress in Gwangju, Korea (28 April– 1 May, 2021). Please save the date! President Choi and his team are working very hard towards plans for an unforgettable congress, both concerning the scientific and social events. Please visit the congress website icdmfr.org and also take a look at the association's website iadmfr.one as we keep it updated with new information and present the elected board members after the Philadelphia meeting.

6 The IADMFR board has discussed an ambitious programme for the next few years and we are extremely happy to have a motivated team to enable us to achieve these plans, which will benefit all IADMFR members. Initiatives include the establishment of a unique adopt-a-member programme to create opportunities for promising students, clinicians and researchers from less advantaged regions or low income countries. The aim of this programme is to guide and invite them to participate in the next IADMFR congress in Gwangju, where they may present a clinical or scientific contribution. In the long run, the IADMFR will continue to invest in creating more opportunities to reach members from all regions worldwide. In a similar vein, we will launch the IADMFR educational track initiative with the first clinicians performing a stationary test at the 2023 ICDMFR congress in Perth. Hopefully, these initiatives may open doors for young and promising Dentomaxillofacial radiologists to join our association and contribute to future initiatives.

Looking forward meeting all of you in the near future at one of the next radiology congresses, and in Korea in April 2021 at ICDMFR!

Reinhilde Jacobs

Secretary General IADMFR

Dear colleagues and friends,

The 22nd International Congress of Dentomaxillofacial Radiology (ICDMFR) and the 70th Annual Session of American Academy of Oral and Maxillofacial Radiology (AAOMR) have been successfully held in Philadelphia on August 22–25, 2019. More than 600 oral and maxillofacial radiologists, and dental colleagues from 55 countries or regions attended this historic joint congress. 40 keynote and invited lectures, and 280 research abstracts were presented during the congress.

The 22nd ICDMFR in conjunction with the 70th AAOMR annual session (www.iadmfr2019.org) featured diagnostic imaging workshops and symposia, covered the latest emerging image technologies, 3D printing and digital dentistry. The program has systematically reviewed imaging diagnosis in the oral and maxillofacial region as well as the entire head and neck structures. Clinical and basic research projects, national and international awards in oral and maxillofacial radiology have been presented in the congress.

For the past two years, it has been my distinguished honour and privilege to serve as the President of the IADMFR. Thank you all for your confidence in me. As the 22nd ICDMFR Organising Committee Chair, I would like to thank all my committee members, Mustafa Badi, Bill Scarfe, Aruna Ramesh, Rumpa Ganguly, Martina Parrone, Saulo Sousa, Bruno Azevedo, Setareh Lavasani, Hui Liang, Debra Gander, Steven Singer and Mel Mupparapu. I very much appreciate their hard work, and excellent leadership in their respective sub-committees.

I would like to thank Prof. Reinhilde Jacobs, the Secretary General, IADMFR Board Members and Regional Directors, Presidents and Past Presidents in Latin America, European Academy, and Asian Academy of Oral and Maxillofacial Radiology. I thank them for their support and help in promoting the international organisation as well as international congress in their respective countries and regions.

Report from the Past- President

Also, I would like to thank Planmeca, UEG Imaging, Morita, XDR Imaging through Science, and NewTom, for sponsoring the congress; Carestream, BeamReaders, Acteon, Infinitt, Diagnocat, and others who participated in exhibitions.

As you know, our international organisation was founded in 1968. Last year was our association's 50th anniversary. This congress was the first international congress of its second half century. It was the first time in history for IADMFR and AAOMR to combine the meeting together. I hope this joint congress will foster collaboration and cooperation, between the two great oral radiology professional organisations, and benefit both organisations, especially younger generations for many years to come.

Oral and maxillofacial radiology is in its golden age of development. IADMFR must make an effort to promote the specialty in research and education worldwide. Like medical radiology, which is a leading force in the development and advancement of modern medicine, we should play a more significant role in dental patient care and development of new imaging modalities. We have 3D cone beam imaging for hard tissues, but we also need to develop 3D imaging for oral and dental soft tissues. We should not only focus on diagnosis, but also for therapeutic procedures, 3D printing and digital dentistry.

8

Over the past few years, I have travelled to Brazil, Chile, Argentina, China, India, Turkey and many European countries, and found they all have strong national dental and maxillofacial radiology organisations. For example, in Brazil, there are more than 5000 oral and maxillofacial radiology professional members. In India there are more than 1000, in Turkey and Chile more than 500. If all of these members can join IADMFR, and share their expertise in radiology practice, research, and education, our organisation would become much stronger. So, let's work together to get more people to join IADMFR and bring more and more oral and maxillofacial radiologists together for future international congresses.

With the fast development of new imaging technology, we are constantly required to keep up to date with the emerging knowledge in the field. We need more people to conduct research, especially for cutting edge diagnostic imaging, artificial intelligence and machine learning. No matter how vast our experience in diagnostic imaging is today, our knowledge will always be limited and out of date without continued learning. The international congress is an excellent opportunity for us to learn from each other, as well as from imaging manufacturers. Therefore, I look forward to seeing many of you again in Gwangju, Republic of Korea in 2021 and Perth, Australia in 2023.

Again, thanks all for your support!

Sincerely yours,

Prof. Jie Yang

Report from the Journal Editor

Dear colleagues, dear friends,

Most of you were at this year's biennial congress in Philadelphia, which I hope you all enjoyed. It was a perfect opportunity to meet with the Editorial Board and all editors of the journal (see photo below).

During the Board of Directors Meeting we voted for the new Editorial Board members. Altogether, nine new members were voted in. Congratulations to them; I am sure the new board members will do an excellent job. I would like to personally express my sincere gratitude to those former long-term Editorial board members that agreed before or during the meeting to step down:

- Keith Horner
- Xu-Chen Ma
- Gerard Sanderink
- Paul van der Stelt
- Kazunori Yoshiura

All of you did an excellent job for the journal, thank you so much for your commitment and extremely valuable long-term service for Dentomaxillofacial Radiology!

Other than this, there is some additional news. The 2018 impact factor decreased to 1.525, which can be easily explained by the fact that the well-cited special issue CBCT (from 2015) fell outside the window used for the IF calculation. However, it should be noted that the 5-year-IF is still substantially higher (2.268). The 5-year IF does not fluctuate that much and is therefore a little more representative, regarding the citation frequency of the journal.

The number of submissions is currently stable and may even increase this year to over 500.

Last but not least I would like to encourage suggestions for the position of Editor-in-Chief of DMFR. As you may know this position will be available from July next year. Please take this opportunity to send us your suggestions for individuals that you believe would be appropriate as Editor of DMFR. Suggestions should be sent to our professional secretariat (b.dellacroce@aimgroup.eu). An evaluation team will go through the suggestions and select the most appropriate candidates for the position.

I wish you a nice, peaceful and joyful year in 2020!

With best regards,

Ralf Schulze

Editor-in-Chief DMFR

Report from Asia

Greetings from Japan,

The 60th general assembly and annual scientific congress of JSOMR was held in Tokyo from 14–16 June 2019 under the guidance of assembly President Professor Kazuya Honda, Department of Oral and Maxillofacial Radiology, Nihon University School of Dentistry. The meeting was attended by over 500 doctors each day. The theme of this congress was “Future and Progress over 60 Years: Look to the world”. The special lectures were “History of EADMFR” by Prof. Tore Arne Larheim, University of Oslo, Norway and “History of ACOMFR” by Prof. Junich Asaumi, Okayama University, President of JSOMFR.

The next congress of JSOMFR will be held by Prof. Yasuhiro Morimoto, Kyusyu Dental University, from 22–24 November 2019 in Kitakyusyu, Japan (e-mail; rinshougazou2019@gmail.com).

The 13th ACOMFR will be held with the 61st JSOMFR in Gifu from 4–7 June 2020 in Gifu, Japan. We would like many radiologists from all over the world to attend. Please check the official website for more information. <http://www.cs-oto.com/acomfr2020/> The banquet will be held on the evening of 8 June. This is an event you will not want to miss. You will be able to enjoy special Japanese cuisine and culture. I look forward to seeing you at the congress.

Yoshinori Arai DDS, PhD
IADMFR Regional Director, Asia

The 60th general assembly on 15 June 2019. In the centre is Prof Tore Arne Larheim.

Dear colleagues, dear friends,

First of all, we would like to congratulate the Past President of IADMFR, Professor Jie Yang and his organising team in the US for a well-organised and successful congress in Philadelphia. It was a pleasure to attend the ICDMFR and to experience the interesting and beautiful city of Philadelphia. Many thanks also to IADMFR Secretary General Reinhilde Jacobs for her dedication when preparing for the congress and for all her hard work for the academy. Thank you to AAOMR for organising the American Academy's annual meeting parallel with the ICDMFR. Finally, we wish many thanks to AIM, IADMFR's secretariat represented by Bernadetta Della Croce, for her excellent work for the academy in general and for the congress in particular.

We were happy to see so many young and promising researchers presenting their new results during the ICDMFR award session. Many of them have attended the European Academy of Dentomaxillofacial Radiology's (EADMFR) junior meeting (find more information below); Dr Olesya Svystun, Dr Gustavo Santaella and Dr Louise Hermann from Aarhus University, Denmark, Dr Hui Chen from ACTA, Amsterdam, Netherlands, Dr Myrthel Vranckx and Dr Sohaid Shujaat, from KU, Leuven, Belgium.

Now we wish professor Soon-Chul Choi, our new IADMFR President, good luck with all the preparations for the coming congress. We look forward to visiting South Korea and the exciting city Gwangju, in April 2021.

In 2023 the academy's members get their first chance to visit Australia and the biggest city of Western Australia, beautiful Perth. We wish the academy's new President Elect, Professor Johan Aps and his organising team good luck with the preparations.

Report from Europe

During the ICDMFR meetings, we are always reminded of all the hard work that goes into our journal *DMFR*. The editor Professor Ralf Schulze and Sophia Anderton representing BIR reported on all the achievements of the journal, that of course relies on high quality research, and the hard work of the authors and referees. During the congress, new members of the editorial board were elected, among them one from Europe, Professor Ingrid Rózyło-Kalinowska. We congratulate Ralf and Sophia on the successful development of the journal.

In February 2020 EADMFR's Junior Committee, chaired by Dr Linda Arvidsson, hosts the 7th Junior Meeting in Amsterdam, Netherlands. The meeting includes lectures and workshops on evidence based medicine, statistics, how to write an article, methods and modalities in radiology, and image interpretation. The chairman of the local organising committee Dr Erwin Berkhout assisted by his team, former participants at the junior meetings, Dr Noro Toxopeus and Dr Fredrique San Giorgi, are preparing for the meeting. Approximately 30 juniors and 10 lecturers/committee members from Europe and other parts of the world are expected to participate. The Junior Meeting is highly anticipated by our younger colleagues and we are looking forward to welcoming many young and promising participants. For more information about the meeting please visit: <https://eadmfr.eu/junior-meeting-2020/> For a glimpse of the last meeting in 2019 watch: https://www.youtube.com/watch?v=ZN4k_VpkHuE

The 17th European Congress of Dentomaxillofacial Radiology (ECDMFR) will take place in Jerusalem, Israel, 9–12 June 2020. We hope to see you all there next year.

EADMFR and the local organising committee chaired by Silvina Friedlander-Barenboim are working very intensely on the preparations for the congress. Don't miss the opportunity to visit the beautiful city of Jerusalem with its interesting history that goes several millennia back. We hope that the congress will attract many delegates from all over the world and that we will get the chance to welcome our fellow members of IADMFR to the congress.

For more information about the European congress in Jerusalem, the pre-congress courses, and the tours organised before during and after the congress, please visit: <https://ecdmfr.eu>

Best wishes from the regional directors in Europe,

Eva Levring Jäghagen, Umeå University, Sweden

Ingrid Rózyło-Kalinowska, Medical University of Lublin, Poland

Report from Latin America

Dear colleagues,

It is a pleasure for us to inform you of the most important activities that have happened in our region during these last months in the field of DMFR. But first we would like to highlight that at the last International Congress of the IADMFR held in Philadelphia on 22–25 August, around 60 colleagues from different Latin American countries attended, and actively participated, which included oral presentations and posters.

Argentina:

The Argentinian Association of Maxillofacial Diagnostic Imaging (AADIMAX), organised its fifth National Congress of DMFR. This congress was held in Salta in May 16–18, 2019 and had invited speakers from Argentina, Bolivia, Chile, Peru, Mexico and Venezuela.

It is worth noting that in Argentina, a new university program training specialists in Oral Radiology has started recently, in the Universidad del Nordeste, Corrientes, run by Dr. Adriana Poletto.

One of the invited speakers, Dr. Adalsa Hernandez, from Venezuela, giving a talk on incidental findings

Mexico:

The Mexican Association of Oral and Maxillofacial Radiology (AMROM) organised its third International Congress of Cone-Beam CT and Maxillofacial Radiology in the city of Puebla, Mexico, on 3–5 October. They also had a pre-conference with the topic “News in Radiological Protection” given by Dr. Alejandro Hidalgo. This pre-conference was held in Atlixco, Mexico, and it was very enriching for everyone.

The congress in Puebla had excellent speakers from Chile, Brazil, Peru, Panama, Colombia and Mexico, and the support of important companies. The congress was attended by approximately 200 people who came from different regions of Mexico and Latin America and was developed in a spirit of fraternity.

19

Group picture of the Pre-conference on Radiological Protection, in Atlixco

Some of the AMROM members, along with some of the international invited speakers, two deans of the most important Dental Schools in Puebla, and two IADMFR Latin American Directors

Congress attendees.
Puebla,
Mexico

Brazil:

The biennial Congress of the Brazilian Association of Oral Radiology (CONABRO) was held on 14–17 August, 2019 at Transamerica Expo Center in São Paulo. 32 key-note speakers and more than 900 participants attended the event. The central theme of the congress was the “high speed of changing” highlighting the way things are evolving. The fast changes were debated in relation to the difficulties and decisions that every clinician has faced in contemporary practice.

The Secretary General of the IADMFR, Professor Reinhilde Jacobs, attended the event as a key-note speaker giving the lecture “The Challenging Dimensions of CBCT”. She also highlighted the fruitful partnership with Brazilian researchers in recent years. In the general assembly, the new ABRO’s board of directors was elected as well as the city where the next congress will take place. The 23rd meeting of the Brazilian Association of Oral Radiology (JABRO,2020) will take place 20–22 August, 2020 in Goiania, a city located in Central-West Brazil, close to the nation’s capital, Brasilia. A young oral radiologist from the region, Dr Juliano Bueno, will be the president of the meeting.

In the field of legislation, a committee was recently appointed by members of the Brazilian College of Radiology, the Brazilian Association of Oral radiology, the Brazilian Association of Medical Physics and the Brazilian Society of Radiation Protection, in order to propose a review of the Brazilian Law on Radiation-Protection (Ordinance #453 of the Ministry of Health/ ANVISA, National Health Surveillance Agency). The Ordinance #453, firstly introduced in 1998, has never been reviewed before, despite the spread of oral radiology, and later, the advent of cone beam CT in the dental field, MRI, Interventional Radiology and PET scanning in the medical field. The draft of the new ordinance #453, has already been passed by public inquiry, and after community input and approval, it will be provided to the Brazilian Government for final approval.

Costa Rica:

The Costa Rican Academia of Oral and Oral and Maxillofacial Radiology (ACROM), created in 2018, is currently organizing the XIII Congress of ALARID, to be held in San José in 17–19 March 2020, with a pre-congress course on imaging of the TMJ on 16 March. This Latin American Congress will be the first National Congress of the ACROM, and the first Ibero- American Congress of DMFR. 300 attendees are expected. Registrations for this Congress are already open at www.alaridcostarica2020.com

Best wishes from the Latin American Directors,

Anne Oenning, Brazil

Alejandro Hidalgo, Chile

Enrique Sierra, México

Report from the Middle East

Dear colleagues,

The 22nd ICDMFR and 70th AAOMR Joint Meeting was held in Philadelphia, USA from 22–25 August, 2019. It was a great congress and very well attended. Many participants were from our region (the Middle East) some of whom have presented and contributed actively during the sessions, various activities and functions. This congress was a very good opportunity for meeting, exchanging knowledge and experience, and contributing and collaborating in our DMFR specialty. Some of the regional conferences that have been conducted recently or will be conducted soon are as follows:

The “Total Radiology Conference” under the patronage of the Ministry of Health, Riyadh, Saudi Arabia (12 September, 2019). The conference focused on the future of medical imaging and artificial intelligence, the future of radiology and privatisation, and Saudi Radiology societies and associations.

The 5th International Dental Conference of King Abdulaziz University, Jeddah, Saudi Arabia (21–24 October, 2019). Many radiology related courses and workshops with a special focus on artificial intelligence, digital dentistry and 3D printing.

AEEDC Education Cairo Conference and Exhibition, Cairo, Egypt (12–14 December, 2019).

Other courses continue to be delivered such as continuing education courses, crash courses for post-graduate dental specialty programs, and other scientific meetings and collaborations. Our members continue to lead the DMFR specialty to a higher level. I would like to express my gratitude and specially thank those who continuously support our specialty and organisation.

Sincerely,

Dr. Emad A. Khan, BDS, MS, PhD, FAGD, Dip. ABOMR

IADMFR Middle East Regional Director

Greetings from North America!

We hope that this edition of the newsletter finds you all doing well.

The American Academy of Oral and Maxillofacial Radiology (AAOMR) held its 70th Annual Session in Philadelphia, PA during an historic joint meeting with the IADMFR from 22–25 August 2019. IADMFR President Prof. Jie Yang was Chair of the Organising Committee. Dr. Bill Scarfe presided over the AAOMR meeting as President while Secretary General Reinhilde Jacobs presided over the 22nd International Congress of the IADMFR. Dr. Mansur Ahmad was celebrated as the new President of the AAOMR. The attendees at this joint conference were able to enjoy many podium lectures such as Dr. Wendy Smoker from the University of Iowa discussing Perineural Spread of Tumors in Head and Neck Cancer and Anatomy and Pathology of the Craniocervical Junction. In addition, Dr. Michael Bornstein reviewed Anatomy and Pathology of the Sinonasal Complex and Dr. Alexander Lee provided an up to date review of Augmented Reality in Dentistry.

One of the highlights of the meeting was a point-counterpoint discussion regarding the emerging topic of the safety of low dose radiation. Dr. Edward Calabrese is a proponent of hormesis; he reviewed the historical development of principles of radiation safety, specifically levels of radiation that are considered safe for radiation workers. His main point was that there seems to be evidence that the safe level of radiation may be higher than the current accepted levels. Dr. Alan Lurie, a PhD radiation biologist in addition to being an Oral and Maxillofacial Radiologist, countered with several points, the gist of which is that the principles of radiation safety exist in order to protect the public, including those in the public sphere who may have increased sensitivity to radiation; and, that there should be a certain degree of safety built into radiation safety guidelines, in order to ensure proper protection of public health.

Report from North America

Many other salient points were made by both Dr. Calabrese and Dr. Lurie during the morning session. The session included an excellent exchange of ideas grounded in the science of radiation safety.

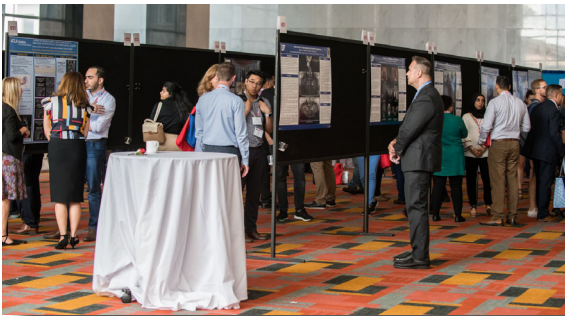

The meeting also included several social events such as touring the National Constitution Centre in Philadelphia as well as the gala reception and dinner at the Philadelphia Union League. It was a wonderful experience to see colleagues from all over the world getting to meet one another and share common experiences.

We hope to see many of our colleagues in Jerusalem in June 2020 and South Korea in 2021!

Respectfully submitted,

Jeffery B. Price, DDS, MS

IADMFR North American Director

Posters and exhibition

Greetings from Canada,

It is now two months since my last report was printed in the general Assembly report of the 22nd International Congress of Dentomaxillofacial Radiology in Philadelphia. I would like to thank our American hosts for an excellent congress.

I would like to commend AAOMFR President, Professor Arai, his organising committee and EADMFR President, Dr. Friedlander-Barenboim, and her organising committee for the hard work they have already done as they prepare to host two very important regional oral and maxillofacial radiological congresses in June 2020: the 13th Asian Congress of Oral and Maxillofacial Radiology in Gifu, Japan (3 –6 June) and the 17th European Congress of Dentomaxillofacial Radiology in Jerusalem, Israel (9–12 June).

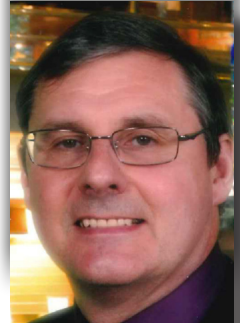

Kind regards,

Dr David MacDonald BDS, BSc(Hons.), LLB(Hons.), MSc, DDS(Edin.),
DDRRCR, FDSRCPS, FRCD(C).
